EDUCATION

University of Guelph

Bachelor of Engineering, Computer Engineering (Co-op)

Expected 2027

Guelph, ON

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, C, Java, HTML/CSS, MATLAB, VHDL

Frameworks & Libraries: React, Tailwind CSS, Flask, Pandas, NumPy

Cloud, Data & AI: AWS, Power BI, Power Automate, Copilot Studio, Dataverse, Dynamics 365, Tableau

Tools & Technologies: Git, Vite, Docker, Linux, Postman, REST APIs, Gemini API, Azure Maps API, Jira, Confluence

EXPERIENCE

AI & Automation Developer Co-op

Sep. 2026 – Dec. 2026

Hammond Power Solutions

Guelph, ON

- Developing AI-powered inventory management and sales history agents using **Copilot Studio**, integrating **Dynamics 365** and **Dataverse** to retrieve enterprise data and deliver insights through natural-language queries.
- Building **Power Automate** cloud workflows across Dynamics 365, Dataverse, SharePoint and Microsoft 365 to automate recurring business processes.

BI & Data Analytics Co-op

May 2026 – Aug. 2026

Hammond Power Solutions

Guelph, ON

- Optimized inventory **Power BI** models and SQL-based queries, repairing approximately **90% of broken measures** and **75% of reports and visualizations** to restore reporting accuracy.
- Reduced dataset refresh times by approximately **50%** through query and workflow optimization across Power BI, Excel and SharePoint.
- Developed a **Python** script using the **Azure Maps API** to retrieve geospatial coordinates for inventory mapping and location analysis.

IT Analyst Co-op

Jan. 2025 – May 2025

Pepper

Toronto, ON

- Automated technical workflows using **Python** and **Postman**, executing REST API requests and processing large JSON payloads.
- Queried backend databases with **SQL** and **Redash**, managed data uploads through **AWS**, and investigated integration issues using GitHub and monitoring tools.
- Resolved **600+** support tickets through Intercom with a **90% first-response rate**; coordinated escalations in Jira and documented procedures in Confluence.

Web Developer & Data Analytics Co-op

Jun. 2024 – Aug. 2024

University of Guelph

Guelph, ON

- Designed and developed a website prototype from scratch for a university sports institute using **JavaScript**, **HTML** and **CSS**.
- Collected sports analytics data from online sources and created interactive dashboards using **Tableau** and **Google Looker Studio** for stakeholder presentations.

PROJECTS

Neuralinq — Intelligent Tutoring System | React, Flask, Python, Gemini API

- Collaborated in an **eight-person Agile/Scrum team**, working in sprints to build a full-stack tutoring platform that uses the **Gemini API** to generate lessons and questions for elementary students.
- Contributed to adaptive question selection using student mastery scores and question difficulty estimates, integrating **React** and **Flask REST APIs** to support progress tracking.

Treasure Runner — Terminal Adventure Game | C, Python, ctypes, curses, Docker

- Developed a terminal-based game with a **C engine** and **Python UI** linked through **ctypes**; implemented graph-based room navigation, collision detection and dynamic memory management.
- Added interactive puzzles and persistent JSON player profiles, with C/Python unit tests and automated integration tests.
