EDUCATION

University of Guelph

Bachelor of Engineering, Computer Engineering (Co-op)

Expected 2027

Guelph, ON

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, C, Java, HTML/CSS, MATLAB, VHDL

Frameworks & Data: React, Tailwind CSS, Flask, Pandas, NumPy, Power BI, Dataverse, Dynamics 365

Tools & Platforms: AWS, Git, Vite, Docker, Linux, Postman, REST APIs, Gemini API, MCP, Power Automate, Copilot Studio, Jira, Confluence

EXPERIENCE

AI & Automation Developer Co-op

Sep. 2026 – Dec. 2026

Hammond Power Solutions

Guelph, ON

- Developing LLM-powered inventory and sales agents in **Copilot Studio**, integrating **Dynamics 365**, **MCP**, and **Dataverse** for natural-language enterprise data retrieval.
- Building **Power Automate** cloud workflows across Dynamics 365, Dataverse, SharePoint, and Microsoft 365 to automate recurring processes.

BI & Data Analytics Co-op

May 2026 – Aug. 2026

Hammond Power Solutions

Guelph, ON

- Repaired approximately **90% of broken Power BI measures** and **75% of reports/visualizations**, restoring reporting accuracy.
- Reduced dataset refresh times by approximately **50%** through query and workflow optimization across Power BI, Excel, and SharePoint.
- Built a **Python/Azure Maps API** tool to generate geospatial coordinates for inventory location analysis.

IT Analyst Co-op

Jan. 2025 – May 2025

Pepper

Toronto, ON

- Automated technical workflows with **Python**, **Postman**, and **REST APIs**, including large JSON payload processing.
- Queried backend data using **SQL/Redash**, supported AWS uploads, and investigated integration issues using GitHub and monitoring tools.
- Resolved **600+ support tickets** with a **90% first-response rate**; managed Jira escalations and Confluence documentation.

Web Developer & Data Analytics Co-op

Jun. 2024 – Aug. 2024

University of Guelph

Guelph, ON

- Built a sports institute website prototype from scratch using **JavaScript**, **HTML**, and **CSS**.
- Collected sports analytics data and created interactive dashboards in **Tableau** and **Google Looker Studio**.

PROJECTS

Neuralinq – Intelligent Tutoring System | *React, Flask, Python, Gemini API*

- Built in an **eight-person Agile/Scrum team**, using the **Gemini API** to dynamically generate lessons and questions for elementary students.
- Implemented adaptive question selection from mastery and difficulty estimates with **React/Flask REST API** integration for progress tracking.

Treasure Runner – Terminal Adventure Game | *C, Python, ctypes, curses, Docker*

- Built a terminal game with a **C engine** and **Python UI** via **ctypes**, using graph-based navigation and dynamic memory management.
- Added puzzles, persistent JSON profiles, and C/Python unit and integration tests.
